🎯 Summary

I am a php Laravel backend developer with a vast array of knowledge in many different front end and back end languages, responsive frameworks, databases, and best code practices. My objective is simply to be the best web developer that I can be and to contribute to the technology industry all that I know and can do. I am dedicated to perfecting my craft by learning from more seasoned developers, remaining humble, and continuously making strides to learn all that I can about development.

📁 Experience

php, laravel	Feb 2025 - Oct 2025 (0 Years, 8 Months)
Frequent Solutions	
php, laravel	Nov 2025 - present (present)
Next Big Technology	

🎓 Education

Bca	Feb 2025 - Present
Vivekananda Global University	

💻 Skills

- PHP
- Laravel
- Magento
- Html
- css
- GitHub

📁 Projects

TouringCompanions
(<https://touringcompanions.com>)
Worked on a multi-panel web application (Admin, Agent, Model, Independent Model, Client) with booking and profile management features.
Implemented premium upgrades, Top 10 listing, animated GIF features, and auto-renewal system.
Developed private messaging and mail functionality for seamless user communication.
Configured cron jobs for automated expiry reminder emails (7, 4, 1 day).

Project: Pod.com – Gaming Application
(API + Admin Panel)
Developed JWT-based user authentication (login & forgot password).
Built APIs for game module including game listing, bid placement, and balance tracking.
Implemented logic to update user balance after each bid.
Created admin panel for managing games, users, and payment transactions (deposits & withdrawals)

**Project: PCatalog (E-Commerce Platform
& Admin Panel)**

(<https://shaar.ps>)

Collaborated on an e-commerce platform for selling automobile spare parts.

Worked with the team to develop and maintain backend functionalities and product management.

Implemented scalable solutions for handling product listings, orders, and user interactions.

Ensured smooth performance and efficient data flow across the platform

VeronainTour

(<https://app.veronaintour.it>)

Independently developed the backend of a hotel booking platform with dynamic content management.

Built admin panel to manage hotel listings including images, links, titles, descriptions, and locations.

Implemented user authentication system (login & registration) for secure access.

Ensured smooth data flow between backend and frontend for real-time content display.

sendme

(<https://nbturls.in/sendme>)

Worked on a grocery platform (web & mobile app) with separate Admin and Vendor panels.

Developed REST APIs for website and mobile app integration, ensuring smooth data flow.

Collaborated with the team to build and manage vendor and admin functionalities.

Implemented scalable backend solutions for efficient order and product management.
